Foreword

Kenya's Statistical Abstract is the single source of data covering a series of years. The Abstract enables you to get complete time series data of the Kenyan Economy from one **SINGLE** official source. The current Abstract therefore contains a comprehensive set of information that is useful for any form of analytical work.

Vision

To become a centre of excellence in production and management of quality statistics

Mission

To develop, provide and promote quality statistical information for evidence-based decision making

The Organization

The Kenya National Bureau of Statistics comprises of six interrelated technical directorates; namely

Production Statistics
Strategy and Development
Finance and Administration
Macro- Economic Statistics
Population and Social Statistics
Information Communication and Technology

Teamwork

Together with users and producers of data, and development partners we are committed to face challenges and opportunities of the 21st Century.

Director General
Kenya National Bureau of Statistics

INTRODUCTION

This Abstract has been prepared by the Kenya National Bureau of Statistics. The tables have been compiled partly from statistics collected directly by the Bureau through Surveys and Censuses and partly from statistics compiled by other Departments of Government and other organizations. The source of the statistical data is shown under each table.

The Kenya National Bureau of Statistics is also responsible for the preparation of the Economic Survey and Leading Economic Indicators in which emphasis is placed on current statistics for which monthly and quarterly series are available. In addition, reports are published on the various regular and ad hoc statistical surveys undertaken by the Bureau.

Whereas these publications aim at providing statistical coverage of the important fields of economic, financial and social activity in Kenya, the published material may not meet detailed requirements of all users. Additional information, whenever available, will be supplied by the Bureau on request, although in certain circumstances, depending on the amount of work involved in extracting the required particulars, it may be necessary to make a **charge.** All enquiries relating to statistical matters should be addressed to:-

SYMBOLS AND CONVENTIONS USED

The following symbols have been used in this publication

"__"Means nil or negligible (less than half the final digit shown).

".." Means figures not available.

"|" between consecutive figures means they have been compiled on a different basis and are not strictly comparable. The nature of the difference is usually indicated in a footnote.

Rounding of Figures: - In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

CONSTITUTION OF KENYA

Kenya's current constitution was **enacted on 27th August 2010** replacing the previous one that had been in place since Kenya's Independence in 1963. It provides the Structure of Government of Kenya to consist of **The Executive, The Legislature**, **The Judiciary** and **The Devolved Governments**.

The Executive

The President, the Deputy President, and the cabinet constitute the executive arm of the Kenyan government. The President is the Head of State and Government, Commander-in-Chief of the Kenya Defence Forces, and the chairperson of the National Security Council.

The President is elected directly by all registered voters for a five year term. For a person to be declared winner of the presidential vote, the candidate must receive more than 50 per cent of the total votes cast, plus at least 25 per cent of the votes cast in more than half of the counties. One can only serve as president for a maximum of two terms.

The Deputy President is the President's principal assistant. During the presidential election, each presidential candidate nominates a running mate. Upon election, this running mate becomes the Deputy President.

The cabinet comprises of the President, the Deputy President, the Attorney General, and 14 to 22 cabinet secretaries. The President appoints the cabinet secretaries, but the appointments must be approved by the National Assembly.

Cabinet Secretaries (**as at 8th April, 2013**)…….....……...……18

NOTE:
In the Constitution 2010, Cabinet Secretaries are appointed from outside Parliament and the President and the Deputy President are no longer Members of the Parliament.

The Legislature (Parliament)

As per Article 93 of the Constitution 2010, the Parliament consists of the National Assembly and the Senate with membership of 418 including the speakers of the two Houses.

(a) The National Assembly

Article 97 of Constitution of Kenya provides for the membership of the National Assembly comprising of the Elected and nominated Members as follows:

Ex-officio- Speaker ……..……..……..... 1

Elected Members from single Member Constituency ……. …….....…… 290

Elected Women from each County Constituting a single member Constituency ……..…47

Nominated Members ……. ……..…….....……..… 12

(b) The Senate

Article 98 of Constitution of Kenya provides for the membership of the Senate consisting of the Elected and nominated Senators as follows

Ex-officio- Speaker ……..……..…….....…….. 1

Elected Senators from each of the 47 Counties ……. …….....……. 47

Nominated Women Senators ……..……..……. 16

Nominated Senators (one man and woman) representing the youth ..…….....…… 2

Nominated Senators representing persons with disabilities ……. …….....…… 2

The Judiciary

The constitution creates an independent judiciary consisting of the courts of law and tribunals. The Chief Justice is the head of the judiciary, and is appointed by the President on the recommendation of the Judicial Service Commission. This is subject to the approval of the National Assembly.

Under the Kenya constitution, the **Supreme Court is the highest court** in Kenya. The Chief Justice is the President of the Supreme Court. This court also comprises the Deputy Chief Justice and five other judges.

The **Court of Appeal is the second highest court** in Kenya. It comprises of at least 12 judges and is headed by a President of the Court of Appeal. The court only has appellate jurisdiction over appeals from the High Court and other courts and tribunals.

The **third highest court in Kenya is the High Court**. The High Court has unlimited original jurisdiction in criminal and civil matters. The court also has supervisory powers over the subordinate courts.

The constitution mandates Parliament to establish special courts to determine disputes related to employment and labour relations, land and environmental matters. These special courts have equal status with the High Court. The High Court does not have any jurisdiction over matters handled exclusively by these special courts.

The Devolved Governments

The Kenya constitution establishes **47 counties**, each with its own government. County governments consist of a county assembly and a county executive. The county assembly is made up of members elected from different wards in the county.

The county governor is the head of the county executive. Voters in each county elect their governor and deputy governor directly. The governor then appoints other members of the county executive committee, with the approval of the county assembly.

MIGRATION AND TOURISM

NOTES AND DEFINITIONS

Migration statistics

The statistics reported are sourced from immigration service under the Kenya Citizenship and Immigration Act, 2011. The Immigration Service is mandated to control and regulate entry and exit of all persons at the airports, seaports and land borders posts, enabling it to collect statistics on movements of all persons to and from Kenya.

The following definitions are used in the compilation Migration Statistics:

Visitors

Visitors entering or leaving Kenya hold either:-

a) an in-transit pass; or
b) a visitor's pass; or
c) a special pass.

They are classified as holiday, business or in-transit visitors according to the purpose of visit stated on their immigration forms. In-transit passes are issued to persons passing through Kenya and are valid for a period of up to one week. These passes are not required by persons in direct transit, crews of aircraft or ships, or day visitors from cruise ships. Such persons are not recorded in the migration statistics. Visitors' passes are valid up to six months initially and can be extended to a total of twelve months to allow a visitor to temporarily pursue his business or profession; they also cover holiday visits. Special passes are valid up to three months.

Length of Stay

This is as the time elapsed between the arrival and departure date stamps on visitor's departure forms and is shown in days. Information on average length of visit tends to understate the actual period stayed per visitor to Kenya (because of the incidence of multiple visits by individuals). Totals of days stayed are not affected by this problem.

HOTEL OCCUPANCY STATISTICS

The definitions used in the classification of hotel occupancy statistics in Tables 16 - 19 are as follows:

Notes on Compilation of National Accounts

In Kenya, national accounts are compiled in line with the international guidelines as prescribed by the United Nations' System of National Accounts agreed in 2008 (the 2008 SNA). The base year for the estimates at constant prices is 2009; while a variety of data sources are used.

The overall structure of national accounts statistics, in terms of concepts and definitions, closely follows the 2008 SNA guidelines with a few exceptions but the concepts and definitions of the 2008 SNA are applied to the extent possible. Work is on-going with a view to implementing the remaining stages of the system while at the same time improving on what has already been done.

Scope

The scope of the national accounts does not meet all the requirements as defined by ISWGNA[1] for implementation of 2008 SNA. The following is part of what is compiled on regular basis (annually)

- value added by activity (current and constant prices)
- expenditures on GDP (current and constant prices)
- value added components by activity (current and constant prices)
- production and generation of income accounts (for total economy and also by activity)
- quarterly Gross Domestic Product (current and constant prices)

At the moment the following SNA recommendations are not included

- illegal output; trade in illicit drugs, prostitution, illegal weapon trafficking etc.

Classification

Classification of transactions as recorded in the accounts broadly follows the 2008 SNA. Classification of economic activities and products is done according to ISIC rev. 4[2] but there are a few deviations while COICOP[3] is used for classifying household final consumption.

Valuation

Transaction	Valuation
Flows and stock	Market prices
Market output	Basic prices
Output for own-use	Market prices
Non-market output	At cost of production
Imports	Free on board (f.o.b)
Exports	Free on board (f.o.b)

Recording is done on accrual basis except for the government's accounts which are on cash basis. Work-in-progress is recorded in the period when it is produced.

The production account has been split into two – the production account and the generation of income accounts. The contribution to the GDP by a producer – its value added – is derived in the production account, while the components of value added are recorded in the generation of income account. The components of value added are taxes on production and imports, compensation of employees and operating surplus/mixed income. In the revised series, production and generation accounts are compiled separately for general government.

The term "mixed income" is used for the surplus generated by unincorporated household enterprises ("jua kali" or informal sector activities). The reason is that the surplus generated by such enterprises includes both remuneration for the labour of the owner and a return to the entrepreneurship and capital employed.

The 2008 SNA has further clarified and slightly extended *the production boundary* through defining all own-account production of goods by households, cultivated natural growth, and production from illegal activities as output. However, in practice it is very difficult, if not impossible, to measure production from illegal activities.

The 2008 SNA makes it clear that *the economic territory* of a country must also include economic free zones that are exempt from taxes and customs duties. Thus, Kenya's Export Processing Zones are included in the calculation of GDP and no exports to or imports from the Zones are recorded.

Taxes on products include the excise and import duties, the road maintenance levy, the insurance premium tax and the value added tax. Other taxes on production consist of taxes on the ownership of land, buildings or other assets used in production or on labour employed. In Kenya this includes various business or professional licenses to the central government and rates, licenses and cesses to the local authorities.

Value added is valued at basic prices as follows:

> Output at basic prices - Intermediate consumption at purchasers' prices = Gross value added at basic prices

Basic prices exclude any taxes payable on products and include any subsidies receivable on products while purchasers' prices include such taxes as well as trade and transport margins.

Factor cost is not favoured by the 2008 SNA, nevertheless, it can still be computed as:

> Gross value added at basic prices - Other taxes on production + Subsidies = Gross value added at factor cost

In practice, however, the difference between factor cost and basic prices is negligible because other taxes on production constitute a very small proportion of taxes in Kenya.

As was the case with the 1993 SNA, the 2008 SNA defines only GDP at market prices and does not make any reference to GDP at factor cost. In order to derive the GDP at market prices, taxes less subsidies on products must be added to total gross value added at basic prices. Thus, GDP at market prices is derived as:

Sum of gross value added of all economic activities at basic prices
+ Taxes on products
- Subsidies on products
= GDP at market prices

Gross national income (GNI) replaces gross national product (GNP). The rationale behind the change is that this aggregate is a concept of income rather than a concept of production.

In the revised national accounts, FISIM is calculated according to the 2008 SNA with separate estimates of FISIM on loans and deposits as follows:

FISIM on loans = L x (RL – RR)
FISIM on deposits = D x (RR – RD)
Total FISIM = FISIM on loans + FISIM on deposits

Where; L = stock of loans; D = stock of deposits; RL = interest rate on loans; RD = interest rate on deposits; and RR = reference interest rate (the "SNA-interest"). The interest rates on loans and deposits have been derived as the implicit rate (interest payable/receivable divided by stock of loans/deposits).The reference rate has been calculated as the average of the interest rates on loans and deposits. There is no recommendation for deflation of FISIM, and the approach used in the Kenya national accounts is to deflate current price values with the CPI all items.

Key addtitions as per the recommendations of the 2008 SNA include; adoption of work-in-progress technique in crops, livestock and construction; compilation of estimates of research and development (R&D); recommendation for the calculation of the output of banks and insurance companies; and military expenditures.

Base Year

In order to analyse the behaviour of the GDP over time independently of the influence of price changes, calculations are made at constant prices. In loose terms, constant price measures inform about the volume of goods and services produced, independent of changes in prices. The GDP series at constant prices are calculated by selecting a reference period, called the base year, and valuing current supply of goods and services in the prices of that year. The base year for the national accounts estimates at constant prices is 2009.

Commodity Flow

A systematic commodity flow technique is largely employed in the compilation of national accounts estimates. This technique entails a systematic confrontation of supply and use data for products at as detailed a level as possible. The format is as follows:

+ Output at basic prices	+ Intermediate consumption
+ Imports	+ Final consumption expenditure
+ Trade and transport margins	+ Gross fixed capital formation
+ Taxes on products	+ Changes in inventories
	+ Exports
= Total supply at purchasers' prices	= Total use at purchasers' prices

Separate commodity flows are compiled for output from domestic producers and for imports. A commodity flow is attached to each production account at the most detailed level and output has been allocated to the use categories listed above except that changes in inventories are not estimated. Exports are available from the foreign trade statistics (goods) and the balance of payments (services). The allocation of supply for domestic use to final and intermediate consumption is often guided by the nature of the products produced.

Separate commodity flows have been compiled for imports of goods and services. The allocation of goods to uses is based on the classification of imports by Broad Economic Categories, which approximately identifies goods for intermediate consumption, goods for final consumption and capital goods.

Margins and taxes on production are added to calculate uses at purchasers' prices. Information on taxes – tax rates and total tax income by category – is available while the estimates of margins are based on reasonable assumptions.

GDP by Activity

GDP is calculated from the production side as the sum of values added.

General Government

General government comprises

- Central government
- Parastatals and statutory bodies
- Local government
- Social security funds

Non-market producers form the major part of general government. They produce services that are supplied free or at prices that are not economically significant. In general, there are no suitable market prices for this kind of services, and the output is valued as the sum of its costs of production. Thus

+ Intermediate consumption
+ Compensation of employees
+ Consumption of fixed capital
+ Other taxes on production
= **Gross output**

The net operating surplus is by convention assumed to be zero. With the exception of the Airports Authority, the government producers are considered non-market producers with output calculated as explained above. Consumption of fixed capital is calculated in total for general government and allocated to the major economic activities (ISIC-categories).

The source data from government financial statistics are on a cash basis. This is used as an approximation of accrual data assuming that the difference between cash and accrual recording is fairly stable. The financial year for general government ends on June 30. Calendar years are calculated as the average of two financial years.

INTERNATIONAL TRADE

Notes and Definitions

1. General - All trade between Kenya and other countries is defined as "external". This trade is classified under the headings of Direct Imports, Domestic Exports, and Re-exports.

2. S.I.T.C - The United Nations' Standard International Trade classification revised and modified to cater for Kenya's needs has been used since January 1964. In June 1989 the S.I.T.C. was revised again and all classifications since June 16th 1989 have been based on those revisions (known as S.I.T.C. Rev. 3). In general the classifications are comparable, but cases where comparison is difficult are indicated in the tables.

3. Direct Imports - These are defined as goods directly imported into Kenya for warehousing. Direct Imports include Government imports and goods subsequently re-exported.

4. Imports for Home Use: Imports for home use mean goods:-

i. which on importation are cleared through Customs, plus
ii. released by Customs from bonded warehouses and
iii. entered into manufacturing plants, less
iv. nationalized re-exports, that is, re-export of goods originally cleared for home used but subsequently re-exported.

In some cases transfers of goods imported in a previous year, or goods transferred at a higher value than when originally imported, or transfers of goods initially imported by parcel post, may distort the relationship between quantity and value, or a value out of proportion to the quantity.

5. Valuation of Imports - Direct Imports are valued at c.i.f. port or place of entry into Kenya; customs duty and internal handling charges are excluded.

6. Country of Origin - The country in which the goods were grown or produced; in the case of manufactured goods, the country in which the manufacturing process was substantially completed. When the country of origin cannot be determined the goods are shown as originating in the country from which they were consigned. From 1976 imports are classified as originating from the country of last consignment.

7. Domestic Exports - These are defined as Kenya produce and manufactures exported to other countries or sold as aircrafts, or ships' stores. From 1976 exports and re-exports are classified as destined to the country of consignment except where such goods are consigned via another country.

8. Re-exports - These consist of imported goods re-exported in the same form to other countries or as aircrafts' or ships' stores.

9. Valuation of Domestic Exports and Re-exports - These are valued of f.o.b. ship or aircraft; the value includes any Kenya cess levy or export tax levied on the goods.

10. Country of Destination - The country to which the goods are finally sent, as far as is known at the time of export.

11. COMESA - The previous Preferential Trade Area (PTA) member countries, Angola, Burundi, Comoros, Djibouti, Ethiopia, Kenya, Lesotho, Mauritius, Mozambique, Rwanda, Swaziland, Tanzania, Uganda, Zambia, and Zimbabwe was replaced by the Common Market for Eastern and Southern Africa (COMESA) in December, 1994

12. With the recent creation of the **East African Cooperation** that became **East African Community**, goods can easily cross the borders without Customs documentation hence not accounted in trade. Nevertheless the value of the goods traded in such manner is of a small proportion that cannot distort the recorded trade.

13. **Specie and Currency Notes** - This item is included at its intrinsic value as base metal and paper respectively.

14. **Gold** - Import and export of gold is included in the external trade statistics.

15. **Parcel Post Imports** - Up to 1970 no imports by parcel post were analysed by article. From 1971 onwards, commercial imports by parcel post have been assigned to their S.I.T.C. code.

16. **Trade Indices** - A Paascherized-Laspeyre formula has been used and 1982 taken as the base year. Indices have been computed for Direct Imports and Total Exports.

17. **Exclusions** - Travelers' samples, passengers' baggage, motor vehicles moved on a triptyque or carnet de passage de Duane, naval and military stores, duty free goods with a value of less than Sh.1,000 moved by air freight, goods in transit to neighbouring countries outside Kenya, diplomatic goods imported and exports by parcel post are excluded from the trade statistics.

18. **Petroleum Products** - All values and quantities given for petroleum products exclude any by products, such as lubricating oils and greases.

19. **Further Information** - More detailed definitions and notes on trade are contained in the Annual Trade Report of Kenya, published by the Customs and Excise Department.

NUMBER AND SIZE OF ESTABLISHMETS

Notes and Definitions

Statistics are shown for establishments rather than firms, which may be made up of more than one establishment. Establishments are defined to mean specific locations in which a clearly identified type of economic activity is being undertaken. In some instances particular operations being undertaken under one roof are further identified into one or more separate establishments provided any of these operations have 50 or more people engaged in them, and provided according to International Standard Industrial Classification, each one of these can be distinctly so classified.

The economic classification used in this Chapter is a slightly modified version of the United Nations 4-digit International Standard Industrial Classification.

Establishments include limited liability companies as well as other forms of business organisations. Public bodies of an "enterprise" nature engaged in "business" activity are also included. The agricultural establishments shown are only those located in the former Scheduled Areas and exclude the very large number of smallholdings outside these areas. Other very small non-agricultural rural establishments are also excluded. The coverage is in fact limited to the "modern" sector, defined to include all establishments in urban areas, large scale farms and other "modern" enterprises located in rural areas plus that part of the public sector which is engaged in activities of an "enterprise" nature.

The source of these data is the *Annual Enumeration of employed and self-employed persons*, which covers the "modern" sector. An attempt is made to include all active "businesses.

Statistics of local companies registered include businesses already in existence, which are converted into companies of limited liability. New nominal capital created in a year includes capital increases by existing limited liability companies through bonus issues, etc.

Statistics of foreign companies consist of details of those companies which are registered outside Kenya but which maintain a place of business in Kenya. The nominal capital of foreign companies is not shown since the total registered capital of these companies gives no indication of the amount they have invested in Kenya.

AGRICULTURE

Notes and Definitions

The terms "small farms" and "large farms" are used in many tables in this Section. "Large farms" are those which used to be included in the former "Scheduled Areas" less those which have been transferred for sub-division into settlement schemes. The "Scheduled Areas" are lands that were formerly occupied by the “white settlers”. "Small farms" include all other areas of arable farming covered in the surveys from which data set out in this Section are derived. Surveys covering the small farms areas started on a limited basis and have been gradually expanded so that they now cover all significant areas of arable farming. In a few districts, e.g. Uasin Gishu, farming is predominantly carried out on large scale holdings. However, they have some areas under small farm settlement schemes. In such cases of predominantly large scale farming the small farms have been brought into the basic agriculture statistics surveys.

The small farms are between 0.2 and 12 hectares though there are some outside this range. In large scale farming districts namely, Nakuru, Uasin Gishu, Trans-Nzoia, Kericho, Nandi and Laikipia, the average size of farms is around 700 hectares. Overall, 25 per cent of the farms range between 20 and 50 hectares.

Most production and price figures shown in the tables refer to calendar years. For this reason they would in some instances differ from data published by marketing organizations in so far as these bodies publish data on other than calendar year basis. Other differences may be due to the fact that a product and its price might be shown at a different stage of processing.

Statistics on value of marketed production are derived from quantities and average prices realised by farmers for commodities delivered to various marketing agents. Attempts are made to estimate value of other production not directly delivered to the boards.

Data on small farms have been collected by means of sample surveys that are subject to sampling errors as well as possible non-sampling errors at district level.

INDUSTRIAL PRODUCTION

Notes and Definitions

1. Coverage:- The Census of Industrial Production (CIP) 2010 covered all formal establishments in Kenya engaged in Mining and Quarrying, Manufacturing; Electricity, gas, steam and air conditioning supply; Water supply, sewerage, waste management and remediation activities. It was more comprehensive than the Census of Industrial Production undertaken in 1972, which covered establishments with twenty or more persons engaged in the mining and quarrying, manufacturing, building and construction sectors.

The unit of enumeration of the industrial surveys is establishments rather than the firm. However, firms are offered the option of responding if their respective establishments do not maintain the books of accounts.

The monthly survey of Industrial Production (MSIP) collects data on quantities and value of output for major products. A volume index for manufacturing is calculated and is used for extrapolation in the absence of other reliable volume indices. Using the Census of Industrial Production 2010 data, whose reference period was 2009, the base for these indices has been revised to 2009.

2. Non-Response: - Estimates have been made for non-response.

3. Definitions: - The definitions used for the Surveys of Industrial production are as follows.

(i) **Compensation of employees** – Compensation of employees is calculated on the basis of the annual Labour Enumeration Survey and includes wages and salaries in cash, wages and salaries in kind and employers' social contributions.

(ii) **Intermediate Consumption** – Consists of the value of goods and services that are used as inputs in the production process. It excludes the use of fixed assets and is valued at purchasers' prices i.e. the price that is payable by the purchaser.

(iii) **Output** - Output is sum of the total values of goods and service sold, bartered, used for payments in kind (including compensation of employees in kind), goods and services supplied by one establishment to another belonging to the same enterprise and changes in inventories of finished goods and work-in-progress.

(iv) **Value Added.** – Value added at basic prices is the difference between output and intermediate consumption.

4. In 1972, Kenya adopted the 4-digit **United Nations Standard Industrial Classification (ISIC Revision 2)** of all economic activities. Changes have however occurred especially with the adoption of SNA 93 System of National Accounts in 2004 leading to re-classifications of data using the recommended ISIC Revision 3 in order to get detailed data by kind of activity. Currently the industrial statistics are classified using ISIC revision 4, in accordance with the international industrial recommendations and data series have therefore been revised from 2008 onwards to conform to the ISIC Rev.4.

BUILDING AND CONSTRUCTION

Notes and Definitions

Statistics of Private buildings are compiled from returns of private buildings and extensions completed in the Counties. The term "extension" includes all major alterations and additions to buildings.

Buildings which are partially residential and partially non-residential have been classified according to their main usage.

The classification is based on the floor area. This is defined as plinth area together with floor area of any external ancillaries such as garages, servants' quarters, store rooms, lavatories, etc.

A block of flats/maisionnettes is counted as a single building.

MINING

NOTES AND DEFINITIONS

Statistics on mineral production are compiled from returns made from mining firms. For salt and lime, only commercial output is covered.

Consequently considerable quantities of these items which are mined are used on farms, etc are not recorded. The value given for gold and gemstones are the amounts realized by producers. The production of gypsum excludes the part used in the production of local cement.

FINANCIAL STATISTICS

Notes and Definitions

Currency - Notes of the Central Bank of Kenya were first issued on 14th September 1966, and coins on 10th April 1967. The volume of Kenya currency in circulation is shown in Table 100.

The unit of currency in Kenya is the Kenya Shilling, which is divided into one hundred cents. The Kenya shilling was tied to the Special Drawing Rights (SDR) on 27th October, 1975. The SDR is a weighted average of exchange rates of the five leading world currencies, namely, the USA dollar, the Pound Sterling the Deutsche Mark, the Japanese Yen and the French Franc. The Euro has been introduced to replace the Deutchemark, French Franc, Dutch Guilder, Italian Lira and Belgian Franc. Notes of the Central Bank of Kenya are circulated in the following denominations: KSh 10/, 20/, 50/-, 100/-, 200/- , 500/- and 1,000/- and coins in denominations of 5 cents, 10 cents, 50 cents, 1/-, 5/-, 10/-, 20/- and 40/-
As from 14th September 1967, East African Currency Board notes ceased to be legal tender in Kenya. The dates for the withdrawal of the legal tender status from the E. A. Currency Board "coin" was 10th April 1969, and the Board wound up at the end of 1969. Data on the Boards assets and currency in circulation is shown in the 1974 and earlier issues of the Statistical Abstract.

Commercial Banking - The main categories of deposits are defined as follows:-
Demand: Subject to transfer by cashing or cheques. These deposits normally carry no rates of interest.

Time: Usually not subject to transfer by cheque and lodged for a definite period subject to notice of withdrawal; interest is paid to depositors.

Saving: Lodged for no fixed period. Certain conditions are applicable to depositors who wish to avail cheque facilities. Interest is paid to depositors.

The Agricultural Finance Corporation - The former Land and Agricultural Bank of Kenya and the Agricultural Finance Corporation were legally amalgamated on 21st March, 1969 to form the **Agricultural Finance Corporation (AFC).** The AFC assumed the functions that were previously performed by the two bodies. Assets and liabilities of the Bank are shown in the 1974 and earlier issues of the Statistical Abstract.

Insurance- Statistics on insurance have been obtained through an annual survey of insurance companies. These surveys for the years up to 1967 were conducted by East African Statistical Department. From 1968 to 1970, Central Bank of Kenya conducted this survey while for the years 1971 – 1991 the survey was done by the then Central Bureau of Statistics. Central Bureau of statistics converted to Kenya National Bureau of Statistics from February 2007. From 1992 onwards

Insurance regulatory Authority has assumed responsibility for this survey.

TRANSPORT, STORAGE AND COMMUNICATION

Notes and Definitions

1 Kenya Railways Corporation

Statistics on the operation of the Railways Corporation relating to: Revenue; Expenditure; Traffic carried; Kilometres of lines open for Traffic; and Stocks of transport equipment are derived from the annual report of the Corporation. For accounting purposes capital expenditure is defined as including purchases of land, expenses of loan issue and interest paid out of capital. This definition of capital expenditure differs slightly from the "economists" definition used elsewhere in this Abstract, e.g. in the tables on Gross Capital Formation included in the National Accounts Section.

2 Kenya Ports Authority

As in the case of the Railways, statistics on Kenya Ports Authority relating to revenue and expenditure are derived from the annual report of the Authority. Consequently, as noted above the definition expenditure differs from the "economists" definition used elsewhere in this Abstract.

3 Shipping

(a) Statistics relate to both steam and sailing ships engaged in international or coastwise trade, arriving either with cargo or in ballast. A tug with lighters in two is counted as a single steamship with a tonnage equal to the combined tonnage of the tug plus the lighters. Naval craft are not included.

(b) Returns are made by the following Kenya Ports - each call at a port being counted separately: - Mombasa, Malindi, Lamu, Kilifi and Shimoni.

4 Air Traffic

a) All scheduled services are operated from Nairobi's Jomo Kenyatta, Mombasa, Moi and Eldoret International Airports, while Wilson Airport operates non-scheduled commercial services only.
b) Air Force/Military, Police, training, testing and private aircraft movements are not recorded.
c) Transit passengers are included once in the total number of passengers handled as from 1970. Prior to 1970 they were included twice.
d) Passengers in transit are those expected to continue their journey either in the same aircraft or in another after a brief stopover.
e) Passengers landing or embarking are mainly those completing or commencing their journey, but the statistics do include a small number changing aircraft or staying over for a few days.
f) Freight handled is weight of cargo and mail unloaded from or loaded into aircrafts. It does not include aircraft fuel or stores or goods remaining in the aircrafts.
g) Movements - Each touchdown and take-off is counted as a separate movement.
h) 1 kilogram (kg.) = 2.205 lb., 1,000 kilograms = 2,205 lb. = 1 Metric Tonne.
i) For the purpose of direction of air traffic, countries of origin and destination of the aircraft have been grouped into regions, in order to avoid disclosing the operations of individual companies. The countries included in each region are as follows:-
   (1) United Kingdom - includes Eire.
   (2) Continental Europe - Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, Germany, Greece, Hungary, Italy, Luxembourg, Netherlands, Norway, Poland, Rumania Spain, Sweden, Switzerland, USSR and Yugoslavia.
   (3) Middle East - Cyprus, Egypt, Iran, Israel, Lebanon, Syria, Turkey.

(4) Arabian Peninsula, Pakistan and India - Aden, Bahrain, Sri Lanka, India, Kuwait, Oman, Pakistan, Saudi Arabia, and Yemen.

(5) Africa North of the Equator (excluding Egypt) - Algeria, Cameroon, Central African Republic, Chad, Dahomey, Ethiopia, Gabon, Ghana, Ivory Coast, Libya, Mali, Mauritania, Morocco, Nigeria, Senegal, Sierra Leone, Somalia, Sudan, Togo, Tunisia, and Upper Volta.

(6) Africa South of the Equator and Adjoining Islands - Angola, Congo Brazzaville, Malagasy (Madagascar), Mauritius, Malawi, Mozambique, Reunion, Republic of South Africa, Zimbabwe, D.R.C and Zambia.

5 Roads:-

The Roads Department completed the road reclassification in 1970. All roads in Kenya now fall under one of the following categories: -

i) ***A*** - ***International Trunk Roads*** - Link centres of international importance, and crossing international boundaries or terminating at international ports.

ii) ***B - National Trunk Roads -*** Link nationally important centres.

iii) ***C - Primary Roads*** - Link locally important centres to each other and to higher-class roads.

iv) ***D - Secondary Roads -*** Link locally important centres to each other and to higher class roads.

v) ***E - Minor Roads -*** Any link to a minor centre.

vi) ***F - Special Purpose Roads*** - Include Parks, township, agriculture, fish and strategic roads.

EDUCATION

Coverage

The statistics in respect of primary and secondary school enrolments refer to enrolment for each year. The statistics cover all schools, i.e. both public and private schools.

Data on Technical Training Institutes excludes enrolments at Kisumu and Eldoret Polytechnics and the Technical Universities of Kenya and Mombasa. Enrolment at the Kenya Technical Teachers College is included together with other Teachers' Training colleges.

Data on higher education consists of enrolments at the Universities of Nairobi, Moi, Kenyatta, Egerton, Jomo Kenyatta University of Agriculture and Technology (JKUAT), Maseno University, Masinde Muliro University and Private Accredited Universities.

Definitions

Schools maintained by the Central Government are classified as "Public" whereas those which receive no grant from the Central Government are classified as "private" schools.

Teachers are categorized into professionally and non-professionally qualified groups. A professionally qualified teacher must either have attended a teacher training college and have been awarded a teaching certificate or be a graduate with a degree of Bachelor of Education or a degree in any other discipline and a teaching diploma.

Any person registered as an examination candidate who immediately before registration was not enrolled as a pupil/student in an educational institution is categorized as a private candidate.

Notes and Definitions

This section provides statistics on morbidity for persons who are under five years old and those who are aged five years and above.

The statistics in Table 161 refers to medical personnel who are registered.

The information in the table should be interpreted with caution given that not all registered personnel may be currently practicing in the country.

Notes and Definitions

The form in which Government accounts are kept and published is determined by administrative structures of the government and the requirements of public finance management controls. Tables in this section present a compilation of Government Finance Statistics (GFS), in a format consistent with international best practices.

Tables 163 –164 show an analysis of Government Appropriation Accounts by revenue and expenditure *net of* and *Gross of* Appropriations-in-Aid, respectively. The two tables' present values of expenditure based on audited government accounts in the respective financial years.

Tables 167–172 cover Economic and functional classificationof the National Government revenue and expenditure while Tables 173 –175 present statistics on Debt stocks and Annual Debt servicing charges.

Tables 176 -180 presentCounty Governments' revenue and expenditure statistics. County Governments' expenditure has been analysed by Economic and functional classifications of expenditure. Economic classification of County Governments' revenue has not been provided due to the high level of aggregation of the source data.

LABOUR

Notes, Definitions and Coverage

Most tables in this section have been derived from the **Annual Enumeration of Employees and Self-employed Persons**, which takes place every year at the end of June. The annual wage bill is estimated from monthly data - the reported earnings for the month of June being multiplied by twelve.

Wage employment figures as shown in this section may not compare with those shown elsewhere in the Abstract, e.g. in the Industrial Production Section. This is due to differences in coverage, timing, etc. between the annual enumeration of employees and the other enquiries in which information on employment is also collected.

Public services include **National Government, Parastatal Bodies, and County Governments.**

All private establishments in urban areas, large-scale farmers and other large-scale enterprises located in the rural areas as well as the public sector establishments which are engaged in industrial, commercial, agricultural and other activities are asked to state their main activity. This forms the basis of industrial classification.

Wage employment figures include casual employees, part-time workers, directors and partners serving on a regular basic salary contract. Self-employed persons and family workers who do not receive regular wages or salaries are excluded. Employment in the informal sector of the economy is not included in the Abstract. Also excluded are employment figures for rural small-scale agriculture and pastoralists activities.

Earnings or wages cover **all cash payments**, including basic salary, cost of living allowances, profit bonus, together with the value of rations and free board, and an estimate of the employer's contribution towards housing. Earnings as shown in this section are lower than the estimate of factor income going to employees because they exclude pensions, employers' contributions to the National Social Security Fund or private provident funds and personal emoluments for the armed forces. Earnings in informal sector, rural small scale agriculture and pastoralists activities are excluded.

The economic classification used in this chapter is a slightly modified version of the United Nations' 4-digit international Standard industrial Classification Revision 4.

Notes and Definitions

The weights used for the Kenya Consumer Price Indices as published in this Abstract are derived from the Kenya integrated Household Budget Survey (KIHBS) undertaken in 2005/06.

The base period for the series is February 2009=100. The series has been computed from February 2009 onwards.

Lower income index of consumer prices is designed to measure changes in retail prices of goods and services consumed by households in the lower income groups which is defined to be of up to income of KSh 23,671 per month. Middle income ranges from KSh 23,671 to KSh 120,000 while Upper income Constitutes of households with income of over 120,000.

Rest of Urban areas refer to those urban areas representing each of the provinces outside Nairobi .
