Revision of the 2017, Gross Domestic Product (GDP)

`

1.0. Introduction

The Kenya National Bureau of Statistics (KNBS) published data on the 2017 Gross Domestic Product in Economic Survey 2018 report that was launched in April 2018. Internal interrogation of the national accounts data after the release led to a review of the nominal gross domestic product for 2017.

Revision of statistics is a standard practice recognized internationally as a critical part of sound statistical production process. It entails modification of previously disseminated statistics usually due to;

- need for updates as further data becomes available
- major revisions required when new methods, definitions, techniques, systems, guidelines and classifications are implemented
- errors and unforeseeable misrepresentations occurring in the production process

2.0. Revision of the 2017 Gross Domestic Product (GDP)

The current revision was mainly informed by notable changes in the data that was used in the compilation especially those to do with prices of particular food crops that considerably led to underestimation of output of growing of crops. The revision was also informed by additional source data that became available after the release of the publication that had a significant effect on the magnitude of the values, thus necessitating the revision. The revision mainly affected data for 2017 and was more pronounced in the GDP at current prices, by production and expenditure approaches.

This statistical release presents a set of revised tables that were published in Chapter 2: Economic Performance of Economic Survey 2018 report. Tables 2.1 to 2.14 provide the revised GDP data.
