Preface

It is my honor to present the 2025 Makueni County Statistical Abstract (CSA). This publication reaffirms our firm commitment to ensuring the availability of high-quality data to support planning, governance, and sustainable development.

As a county, we recognize that reliable statistics are not merely numbers but the foundation upon which informed policies are built and the lens through which we understand our progress, opportunities, and challenges.

This Statistical Abstract brings together a rich compilation of data and sectoral insights that collectively provide a comprehensive overview of Makueni County's social, economic, and environmental landscape. It offers an important baseline for evidence-based decision-making by government departments, development partners, the private sector, civil society, and the wider community.

The preparation of this CSA was made possible through strong collaboration between the County Government of Makueni and the Kenya National Bureau of Statistics (KNBS). I sincerely appreciate the professionalism and

dedication demonstrated by both teams in ensuring the accuracy, consistency, and reliability of the data. This partnership demonstrates the importance of collaboration in strengthening statistical systems both at the national and county levels.

As we navigate an increasingly complex development environment characterized by evolving socio-economic dynamics, climate-related challenges, and emerging opportunities, this Statistical Abstract will serve as a key reference tool. It will support policy formulation, resource allocation, monitoring of development outcomes, and the continuous improvement of public service delivery. Our commitment to data-driven governance is anchored in the belief that informed decisions lead to transformative and lasting impact for our people.

Looking forward, the county will continue to strengthen collaboration with national government agencies, research institutions, private-sector innovators, and communities to improve data collection, analysis, and dissemination. These efforts will ensure that our statistics accurately reflect the realities and aspirations of the people of Makueni.

The county also recognizes the critical role of technology in modern data management. We will adopt digital tools, reliable data platforms, and advanced analytics to enhance transparency, efficiency, and responsiveness in public service. In addition, an interactive data dashboard on the county website will enable stakeholders to access and visualize key indicators in real time, improving transparency and timely policy responses.

I am confident that Makueni County will continue to be a leader in data-driven governance, where decisions are guided by evidence and aligned with our shared vision of a prosperous, value-based county with a high quality of life.

H.E Mutula Kilonzo Junior, CBS
Governor, Makueni County

Foreword

Reliable and high-quality statistics are essential for evidence-based decision-making worldwide. The United Nations Fundamental Principles of Official Statistics highlight that official statistics are a vital part of democratic governance, offering impartial and trusted data to support social, economic, and environmental development.

These principles form the basis for countries to develop strong national statistical systems that meet global standards of quality and consistency transparency.

At the regional level, the African Charter on Statistics, the Strategy for the Harmonization of Statistics in Africa (SHaSA), and the East African Community (EAC) Statistical Protocols strengthen the global commitment to improved statistical capacity. These frameworks guide Member States in producing comparable and harmonized statistics that support monitoring of continental priorities, including Agenda 2063 and the SDGs. Guided by these global and regional standards, Kenya—through the Statistics Act, CAP

112 Laws of Kenya [Rev. 2022]—mandates the Kenya National Bureau of Statistics (KNBS) to coordinate the National Statistical System and to assist both national and county governments in producing credible, timely, and relevant official statistics. County-level statistics play a vital role in informing planning, resource allocation, and development programs under Kenya’s devolved system of governance.

It is within this framework that the 2025 Makueni County Statistical Abstract (CSA) has been produced. KNBS, in collaboration with the County Government of Makueni, has compiled this comprehensive reference document using data drawn from administrative records and sample surveys conducted by Ministries, Departments, and Agencies (MDAs) at both levels of government. The publication presents data series for the period 2020–2024, offering a unified and authoritative source of statistics for the County.

The CSA has been developed in line with established procedures for producing official statistics. Data was validated by MDAs across the County and subsequently reviewed by a joint technical team from KNBS and the County Government of Makueni to ensure accuracy and quality. The publication is organized into five thematic domains—Demographic and Social; Economic; Environment; Governance; and Cross-cutting Statistics—reflecting internationally recognized statistical classifications.

I invite stakeholders, planners, researchers, and the public to make full use of the information contained in this Abstract. The data provides valuable insights to support evidence-based planning, monitoring, and evaluation of development initiatives within Makueni County.

KNBS appreciates the collaboration with the County Government of Makueni in producing this publication and remains committed to strengthening the generation and use of quality statistics across all counties.

Macdonald G. Obudho, PhD, EBS, MBS
Director General
Kenya National Bureau of Statistics

Acknowledgement

The production of the 2025 Makueni County Statistical Abstract is the result of the collective effort, collaboration, and expertise of many institutions and individuals.

I sincerely appreciate all contributors, partners, and stakeholders whose commitment made the compilation and publication of this important document possible.

I extend my deep gratitude to H.E. Mutula Kilonzo Junior, Governor of Makueni County, and H.E. Lucy Mulili, Deputy Governor, for their strong leadership, guidance, and continued support throughout this process. Their dedication to evidence-based planning and promotion of data-driven governance has been central to the successful development of this publication.

I also acknowledge my fellow County Executive Committee Members, Chief Officers, Directors, and the wider county staff for their valuable contribution. Your cooperation in providing data, reviewing content, and supporting the production of this Abstract greatly enhanced the quality of

this document.

I am equally grateful to the Kenya National Bureau of Statistics (KNBS) for their critical technical support and partnership. Their expertise was essential in ensuring the accuracy, reliability, and credibility of the data presented. I further appreciate the departmental heads at both the national and county governments who participated in the validation processes that strengthened this publication.

Special recognition is extended to the CSA Technical Team, led by Boniface Mutua (Chief Officer – Planning, Budget, Revenue & M&E) and Benjamin Avusevwa (Director – Statistical Coordination and Methods, KNBS). The team comprising Stanlus Matheka, Hastings Mwangangi, Mathias Mbweli, Cynthia Musangi, Veronica Ndeto, Charity Mumu, Justus Mutunga, Patricia Kanzi, Lydia Omare, Amos Mwau, Franklin Moturi, Samuel Maosa, and Everlyne Akose, demonstrated exceptional professionalism and dedication throughout the development of this Abstract. I also commend the enumerators whose diligent work in data collection, analysis, and presentation significantly strengthens the quality of this publication.

This Statistical Abstract reflects our shared commitment to strengthening evidence-based decision-making across all sectors of our county. As a department, we remain dedicated to leveraging technology to modernize data systems and enhance efficiency, timeliness, and analytical insights. Through the adoption of digital tools and modern methodologies, we continue to improve how data is collected, analyzed, and used in support of a responsive and forward-looking county government.

Introduction

Overview of Makueni County

Makueni County is one of the 47 counties in Kenya, located in the south-eastern region of the country. It shares borders with Machakos County to the north, Kitui County to the east, Taita Taveta County to the south, and Kajiado County to the west. The county lies between Latitude 1°35' and 3°00' South and Longitude 37°10' and 38°30' East, covering a total area of 8,176.7 km².

The county is predominantly inhabited by the Akamba community, who constitute approximately 97 percent of the total population. Other ethnic communities are also represented, particularly within major towns and trading centres. Makueni has an average population density of 110 persons per km², with Mbooni Subcounty recording the highest density at 199 persons per km², while Kibwezi Subcounty has the lowest at 62 persons per km². The county headquarters are located in Wote Town, which hosts both the County Government and National Government administrative offices. Wote town lies approximately 130 Km from Nairobi.

The county's economy is largely driven by agriculture, alongside beekeeping, small-scale trade, dairy farming, eco-tourism, and other commercial activities. Agriculture remains the backbone of the local economy, contributing 26% to the county's Ksh. 151.12 billion Gross County Product in 2023. Farmers cultivate a variety of crops including maize, beans, millet, sorghum, fruits (such as mangoes, oranges, and bananas), and vegetables. Livestock production especially cattle, goats, and poultry is also widely practiced. Growing agro-processing initiatives continue to add value to agricultural produce, generate employment, and strengthen the county's economic base.

Makueni is also home to part of Tsavo National Park, located in the southern region of Kibwezi West Subcounty. The park is renowned globally as one of the world's biodiversity strongholds, hosting a rich variety of wildlife, including the iconic Big Five—lion, black rhino, elephant, buffalo, and leopard. It also supports an impressive array of bird species such as the black kite, crowned crane, lovebirds, and the sacred ibis. This remarkable ecological diversity makes Tsavo National Park a premier tourism destination, attracting both domestic and international visitors seeking to experience its unique natural heritage.

3. Domain Three: Environmental Statistics

The breakdown in this domain follows the structure of the Framework for the Development of Environment Statistics approved by the United Nations Statistical Commission in 2013. More detailed breakdown of statistical areas can be found in the FDES. It covers statistical activities on the state and changes of environmental conditions, the quality and availability of environmental resources, the impact of human activities and natural events on the environmental conditions.

3.1. Environment

The sub domain covers statistics about the physical, biological and chemical characteristics of the environment. The FDES further breaks it down to three subcomponents: (1) physical conditions of the atmosphere, hydrographical information, geological and topographic information, and soil characteristics; (2) land cover, ecosystems and biodiversity, protected areas and species; and (3) quality of air, water and soil.

4. Domain Four: Governance Statistics

The breakdown in this domain follows the structure of the Handbook of Governance Statistics (HGS) approved by the UN Statistical Commission in 2020. More detailed breakdown on statistical areas can be found in the HGS. (This Domain replaces and expands subdomain 1.8 'Justice and crime' of the earlier version of the classification (CSA 2009).

4.1. Participation

This sub domain covers statistics on the ways in which individuals take part in political and public affairs, including by registering to vote, voting or standing as a candidate in elections; being members of legislative, executive and judicial bodies; accessing positions in the public service; being a member of a trade union; and engaging, individually or as members of political parties and other non-governmental organizations, in political activities.

Table 4.1.1: Number of Registered Voters by Constituency and Ward; 2013, 2017 and 2022

5. Domain Four: Governance Statistics

The breakdown in this domain follows the structure of the Handbook of Governance Statistics (HGS) approved by the UN Statistical Commission in 2020. More detailed breakdown on statistical areas can be found in the HGS. (This Domain replaces and expands subdomain 1.8 'Justice and crime' of the earlier version of the classification (CSA 2009).

5.1. Participation

This sub domain covers statistics on the ways in which individuals take part in political and public affairs, including by registering to vote, voting or standing as a candidate in elections; being members of legislative, executive and judicial bodies; accessing positions in the public service; being a member of a trade union; and engaging, individually or as members of political parties and other non-governmental organizations, in political activities

Table 5.1.1: Number of Beneficiaries of ICT Capacity Building Programmes, 2020/21 - 2024/25

Sub-County	2020/21						2021/22						Number
