INTRODUCTION

This Abstract has been prepared by the Central Bureau of Statistics of the Ministry of Finance and Planning. The tables have been compiled partly from statistics collected directly by the Bureau and partly from statistics compiled by other Government Departments and other organizations. The source of the statistics is shown under each table.

The Central Bureau of Statistics is also responsible for the preparation of the Economic Survey and leading economic indicators in which emphasis is placed on current statistics for which monthly and quarterly series are available. In addition, reports are published on the various regular and ad hoc statistical surveys undertaken by the Bureau.

Whereas these publications aim at providing statistical coverage of the important fields of economic, financial and social activity in Kenya, the published material may not meet detailed requirements of all users. Additional information, whenever available, will be supplied by the Bureau on request, although in certain circumstances, depending on the amount of work involved in extracting the required particulars, it may be necessary to make a charge. All enquiries relating to the Statistical Abstract and the Economic Survey and on statistical matters generally should be addressed to:-

**THE DIRECTOR OF STATISTICS,
MINISTRY OF FINANCE AND PLANNING
P.O BOX 30266,
NAIROBI, KENYA.**

Symbols and Conventions used

The following symbols have been used through the Abstract.

"—" Means nil or negligible (less than half the final digit shown).

".." Means figures not available.

"|" between consecutive figures means they have been compiled on a different basis and are not strictly comparable. The nature of the difference is usually indicated in a footnote

Rounding of Figures:- In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Parliament consists of President and the National Assembly:-

(a) The President:

Is the Head of the State and Commander-in-Chief of the Armed Forces of the Republic to be elected in accordance with the provisions of the Constitution. (Act. No. 28 of 1964, however, provided for the first President to be the person who immediately before the 12th December, 1964, held the Office of the Prime Minister under the Constitution). The Constitution of Kenya (Amendment) Act No. 6 of 1992 provided that the candidate for President who is elected as a Member of the National Assembly and who receives a greater number of valid votes cast in the Presidential election than any other candidate for President and who, in addition receives a minimum of twenty-five percent of the valid votes cast in at least five of the eight

provinces shall be declared to be elected as President.

(b) The National Assembly

The Constitution of Kenya (Amendment) No. 4 Act 40 of 1966 provided for the establishment of a National Assembly comprising one House, thus the Senate and House of Representatives were amalgamated to form one Chamber (Unicameral System) and the Constitution of Kenya (Amendment) (No.2) Act No. 45 of 1968 provided for an election of the President and the Nominated Members.

POPULATION AND VITAL STATISTICS

The 1999 Population and Housing Census

The 1999 Population and Housing Census was the sixth census to be carried out since 1948 and the fourth since independence. It was carried out between the night of 24th/25th and 31st August, 1999. The coverage was on a defacto basis with midnight of 24th/25th August being the reference date.

The main objective of the 1999 census was to ascertain the country's population size by enumerating all persons (whether citizens or not) who were within the borders of Kenya on the mid-night of 24th/25th August, 1999. The specific objectives were to collect data on:-

- Composition and spatial distribution of the population.
- Levels of education attained by the population
- Levels of fertility, mortality and migration rates
- Rate and pattern of urbanization
- Size and utilization of the labour force, and
- Housing conditions and availability of social amenities

Already two basic census reports have been published from the 1999 census data. A more detailed analysis is to be carried out to produce eight monographs on each of the census thematic areas, eight provincial reports, a popular report and a census atlas. All the census publications will be disseminated to stakeholders for effective utilization.

Comparison of the various censuses should be done with caution since district boundaries as well as those of lower administrative units have changed considerably over the years. This has also affected a number of local authorities.

Area and Density

During the preparatory phase for the 1999 Population and Housing Census, modern and more advanced techniques were used for area estimation. The population densities shown are based on land area, excluding water.

Education

The information published in this edition of the abstract refer to highest level completed. For example a person who was in standard 7 in 1999 was reported to have completed standard 6. Hence the data presented in 1999 census is compatible with the 1969, 1979 and 1989 census data on education.

Vital Statistics

The office of the Registrar General has, since 1964, undertaken a phased extension of the areas of compulsory registration, culminating in the extension of total coverage of the whole country on 1st September, 1971. In view of this, the whole Vital Statistics collected for Europeans and Asians may be considered reliable, those for Africans are apt to be under-estimated.

More-over, the increase in births and deaths registered in each area is partly a consequence of improved coverage and partly the effect of increased public awareness on the advantages of registration

MIGRATION AND TOURISM

NOTES AND DEFINITIONS

Migration statistics

Migration statistics are collected under the Immigration Act 1967. Under this Act immigration controls on movements to/from Uganda and Tanzania were imposed, making it possible to collect statistics of movements to/from Uganda and Tanzania and integrate them with statistics of movements to/from outside East Africa.

Although the coverage of the statistics is fairly complete, they understate total movements because of the fact that not all border crossings have Immigration posts. From 1971, the following definitions have been in use. (They differ somewhat from those previously applicable - see "Notes and Definitions" page 24, Statistical Abstract, 1971).

Visitors

Visitors entering or leaving Kenya hold either:-

- a) an in-transit pass; or
- b) a visitor's pass; or
- c) a special pass.

They are classified as holiday, business or in-transit visitors according to the purpose of visit they state on their immigration forms. In-transit passes are issued to persons passing through Kenya and are valid for a period of up to one week. These passes are not required by persons in direct transit, crews of aircraft or ships, or day visitors from cruise ships. Such persons are not recorded in the migration statistics. Visitors' passes are valid up to six months initially and can be extended to a total of twelve months to allow a visitor to pursue temporarily his business or profession; they also cover holiday visits. Special passes are valid up to three months.

Length of Stay

This is shown in days as the elapsed time between the arrival and departure date stamps on visitors departure forms. Information on average length of visit tends to understate the actual period stayed per visitor to Kenya (because of the incidence of multiple visits by individuals). Totals of days stayed are not affected by this problem.

HOTEL OCCUPANCY STATISTICS

In 1978 these covered 272 hotels and game lodges in Kenya. The coverage of the statistics has been improved since their collection was initiated and it is now possible to give figures by a more detailed classification and country of residence of guest. Children under twelve years

old not occupying a separate adult bed are not included in the occupancy figures. The definitions used for the new classification in Table 29 and 30 are as follows:

Major Zone	Sub-Zone	Definition
1. NAIROBI	(a) High Class (b) Other	Coastal strip up to 1km inland:-
2. BEACH	(a) South (b) North Mombasa (c) Kilifi/Watamu (d) Malindi/Lamu	South of Likoni ferry. Nyali Bridge to Mtwapa Bridge. Mtwapa Bridge to Malindi Point. Malindi Point to Kiunga, including islands. The Island.

NATIONAL ACCOUNTS

Notes and Definitions

The definitions adopted in establishing National Accounts are by and large consistent with those laid down in the United Nations System of National Accounts - Series F No. 2 REV 3. At present, Production and Capital Formation are the only two aggregates of national accounts, which are estimated, in the main, directly. Field work has however, started on collection of data required to enable direct estimates of Income and outlay and Consumption Expenditure accounts, also to be undertaken.

For the years 1972 onwards the industrial classification of production and Capital Formation accounts is based on the 4 digit United Nations International Standard industrial classification, slightly modified to suit Kenya's need. It has not been possible, however, to carry back this classification beyond 1972. Some changes in method have also been made as well as change of the base year from 1964 to 1972 and 1972 to 1976 and from 1976 to 1982 for the deflation of Production and Capital Formation accounts. Further the old 3 digit classification is not conformable with the new 4 digit classification. These comments apply to all tables in this chapter except Tables 42 and 43. The CBS has adopted the conceptual guidelines of the fifth edition of the Balance of Payments manual. Data has been revised as far backward as 1996.

The figures on Gross Domestic Product measure the value of output of goods and services each year by residents of Kenya. The figures are gross because no deduction has been made to allow for consumption of fixed capital assets in the production of the output. The following differences between the definitions as specified in the United Nations System of National Accounts and those used in calculations as published here should be noted.

- i) No imputation is made in the production accounts for consumption of Government fixed capital.
- ii) Private enterprises producing non-profit services for households are not identified distinctly as a sector.

Surveys of production in Agriculture, Industry, Distribution and Services, Transport, Storage and Communication sectors are the main source of information on the monetary component of production in these sectors. The results obtained from the surveys and their coverage are indicated in the relevant sections of this Abstract. By and large there is total coverage of larger establishments, defined as employing more than 50 people, and a sample coverage of smaller firms employing between 20 to 49 people. For the industrial production sectors, this information is supplemented by periodic censuses of production. For those segments of particular sectors on which information is not collected regularly, estimates of production for the inter-survey/census years are made by using information obtained from the censuses/surveys as benchmarks. Information on some variables like labour costs is collected annually through specific surveys like the annual Enumeration of Employees.

Information on product estimates for the private element of other sectors is obtained from the following three sources:

- i) limited field studies, e.g. of sectors such as Forestry and Ownership of Dwellings,
- ii) direct supply of data from the enterprises that operate in the sectors such as Electricity, Water and Banking.

Information required to make production estimates of the public sector is obtained directly from the accounting records, both published and unpublished, of units in the public sector. In the case of Central Government, published accounts undergo a considerable amount of re-analysis before being used in the calculations.

Production in the Traditional Sector is estimated by interpolating annual estimates of population connected with traditional production to estimates of aggregates such as consumption of firewood, number of dwelling etc. in the base years for which information has been directly obtained.

The figures on Capital Formation measure expenditures on fixed assets, which represent a gross addition to the stock of capital in the economy. Thus purchases of land and second hand assets are excluded since expenditure on these represents transfer of assets within the economy rather than additions to total capital. No deduction is made for capital used by depreciation, obsolescence or unforeseen damage.

Estimates of Capital Formation of the private sector are undertaken by and large on a commodity flow basis. Statistics from End-Use Analysis of Imports and on Buildings completed are the two main sources of information. Information from these two sources is supplemented by data collected in agricultural and industrial surveys. Data on Capital Formation estimates of the public sector - as in the case of production accounts - are obtained directly from the accounting records of the public sector.

Estimates of Capital Formation in construction are undertaken on a "work done" basis. This is consistent with the recommendations laid down in the United Nations Systems of National Accounts.

Deflation of Production and Capital Formation accounts to constant (1982) prices is undertaken using a series of indices. Use is made of both quantity and price indices. A large majority of these are indices of output applied to estimates of value added at current prices. However, indices of labour costs are also used to deflate the product estimates of some small sectors. In the case of agriculture "double deflation" method is used i.e. both inputs as well as outputs are deflated.

INTERNATIONAL TRADE

Notes and Definitions

1. General - All trade between Kenya and other countries is defined as "external". This trade is classified under the headings of Direct Imports, Domestic Exports, and Re-exports.

2. S.I.T.C - The United Nations' Standard International Trade classification revised and modified to cater for Kenya's needs has been used since January 1964. In June 1989 the S.I.T.C. was revised again and all classifications since June 16th 1989 have been based on those revisions (known as S.I.T.C. Rev. 3). In general the classifications are comparable, but cases where comparison is difficult are indicated in the tables.

3. Direct Imports - These are defined as goods directly imported into Kenya for use for warehousing. Direct Imports include Government imports and goods subsequently re-exported.

4. Imports for Home Use: Imports for home use mean goods:-

- which on importation are cleared through Customs, plus
- released by Customs from bonded warehouses and
- entered into manufacturing plants, less
- nationalized re-exports, that is, re-export of goods originally cleared for home used but subsequently re-exported.

In some cases transfers of goods imported in a previous year, or goods transferred at a higher value than when originally imported, or transfers of goods initially imported by parcel post, may distort the relationship between quantity and value, or a value out of proportion to the quantity.

5. Valuation of Imports - Direct Imports are valued at c.i.f. port or place of entry into Kenya; customs duty and internal handling charges are excluded.

6. Country of Origin - The country in which the goods were grown or produced; in the case of manufactured goods, the country in which the manufacturing process was substantially completed. When the country of origin cannot be determined the goods are shown as originating in the country from which they were consigned. From 1976 imports are classified as originating from the country of last consignment.

7. Domestic Exports - These are defined as Kenya produce and manufactures exported to other countries or sold as aircrafts, or ships' stores. From 1976 exports and re-exports are classified as destined to the country of consignment except where such goods are consigned via another country.

8. Re-exports - These consist of imported goods re-exported in the same form to other countries or as aircrafts' or ships' stores.

9. Valuation of Domestic Exports and Re-exports - These are valued of f.o.b. ship or aircraft; the value includes any Kenya cess levy or export tax levied on the goods.
10. Country of Destination - The country to which the goods are finally sent, as far as is known at the time of export.
11. COMESA - The previous Preferential Trade Area (PTA) member countries, Angola, Burundi, Comoros, Djibouti, Ethiopia, Kenya, Lesotho, Mauritius, Mozambique, Rwanda, Swaziland, Tanzania, Uganda, Zambia, and Zimbabwe was replaced by the Common Market for Eastern and Southern Africa (COMESA) in December, 1994.
12. With the recent creation of the East African Cooperation that became East African Community, goods can easily cross the borders without Customs documentation hence not accounted in trade. Nevertheless the value of the goods traded in such manner is of a small proportion that cannot distort the recorded trade.
13. Specie and Currency Notes - This item is included at its intrinsic value as base metal and paper respectively.
14. Gold - Import and export of gold is included in the external trade statistics.
15. Parcel Post Imports - Up to 1970 no imports by parcel post were analysed by article. From 1971 onwards, commercial imports by parcel post have been assigned to their S.I.T.C. code.
16. Trade Indices - A Paascherized-Laspeyre formula has been used and 1982 taken as the base year. Indices have been computed for Direct Imports and Total Exports.
17. Exclusions - Travelers' samples, passengers' baggage, motor vehicles moved on a triptyque or carnet de passage de Duane, naval and military stores, duty free goods with a value of less than Sh.1,000 moved by air freight, goods in transit to neighbouring countries outside Kenya, diplomatic goods imported and exports by parcel post are excluded from the trade statistics.
18. Petroleum Products - All values and quantities given for petroleum products exclude any by products, such as lubricating oils and greases.
19. Further Information - More detailed definitions and notes on trade are contained in the Annual Trade Report of Kenya, published by the Customs and Excise Department.

NUMBER AND SIZE OF ESTABLISHMENTS

Notes and Definitions

Statistics are shown for establishments rather than firms which may be made up of more than one establishment. Establishments are defined to mean specific locations in which a clearly identified type of economic activity is being undertaken. In some instances particular operations being undertaken under one roof are further identified into one or more separate establishments provided any of these operations have 50 or more people engaged in them, and provided according to International Standard Industrial Classification each one of these can be distinctly so classified.

The economic classification used in this chapter from 1972 is a slightly modified version of the United Nations 4-digit International Standard Industrial Classification.

Establishments include limited liability companies as well as other forms of business organizations. Public bodies of an "enterprise" nature engaged in "business" activity are also included. The agricultural establishments shown are only those located in the former scheduled areas and exclude the very large number of smallholdings outside these areas. Other very small non-agricultural rural establishments are also excluded. The coverage is in fact limited to the "modern" sector, defined to include all establishments in urban areas, large scale farms and other "modern" enterprises located in rural areas plus that part of the public sector which is engaged in activities of an "enterprise" nature.

The source of these data is the *Annual Enumeration of employed and self-employed persons*, which covers the "modern" sector. An attempt is made to include all active "businesses".

Statistics of local companies registered include businesses already in existence, which are converted into companies of limited liability. New nominal capital created in a year includes capital increases by existing limited liability companies through bonus issues, etc.

Statistics of foreign companies consist of details of those companies which are registered outside Kenya but which maintain a place of business in Kenya. The nominal capital of foreign companies is not shown since the total registered capital of these companies gives no indication of the amount they have invested in Kenya.

Bankruptcy statistics do not include companies winding up under the Official Receiver.

AGRICULTURE

Notes and Definitions

The terms "small farms" and "large farms" are used in many tables in this Section. "Large farms" are those which used to be included in the former "Scheduled Areas" less those which have been transferred for sub-division into land settlement schemes. "Small farms" include all other areas of arable farming covered in the surveys from which data set out in this Section are derived. Surveys covering the small farms areas started on a limited basis and have been gradually expanded so that they now cover all significant areas of arable farming. In a few districts, e.g. Uasin Gishu, farming is predominantly carried out on large scale holdings. However, they have small areas under small farm settlement schemes. In such cases of predominantly large scale farming the small farms have been brought into the basic agriculture statistics surveys.

The small farms are between 0.2 and 12 hectares though there are some outside this range. In large scale farming districts namely, Nakuru, Uasin-Gishu, Trans-Nzoia, Kericho, Nandi and Laikipia, the average size of farms is around 700 hectares. Over all, 25 per cent of the farms range between 20 and 50 hectares.

The production and price figures shown refer to calendar years. For this reason they would in some instances differ from price and production figures published by marketing organizations in so far as these bodies publish data on other than calendar year basis. There may be differences for other reasons also, such as the fact that a product and its price might be shown at a different stage of processing.

Statistics on value of marketed production are derived from quantities and average prices realised by farmers for commodities delivered to various marketing agents. No attempts are made to estimate value of production not directly delivered to the boards.

Data on small farms have been collected by means of sample surveys involving high sampling errors at district and provincial level, as well as possible non-sampling errors, and the estimates should therefore be treated with caution especially those relating to districts which are predominantly pastoral or large farm areas.

FORESTRY AND FISHING

Notes and Definitions:

The table on timber production covers timber and other forest produce from forests controlled by the Forest Department. Timber cut on private farms and estates is excluded, and also a very small amount of timber issued free by the Forest Department. The amounts excluded in this way form only a small proportion of total production.

INDUSTRIAL PRODUCTION

Notes and Definitions

1. Coverage:- The Census of industrial Production, 1967 covered all establishments with five or more employees, engaged in manufacturing, mining and quarrying, and building and construction sectors.

Census of Industrial Production, 1972 was more extensive in coverage than that undertaken in 1967 and covered establishments with twenty or more persons engaged in the mining and quarrying, manufacturing, building and construction sectors. For smaller establishments which engaged between five and twenty people, a 25 per cent sample was taken and a 20 per cent sample for establishments engaging less than five people.

The annual surveys of industrial production, undertaken in between the more complete censuses and are therefore limited in scope, were conducted for years 1965-1966; 1968-1971; 1973-1976, covering only large scale establishments, defined as those with fifty or more employees. However, since 1970, 25 per cent sample of firms engaging between 20 and 49 persons has been included in the surveys.

The last census was for 1977 and covered all establishments employing 20 or more persons, a 50 per cent sample of those employing between 5 and 19 persons and 10 per cent sample of establishments in the 1-4 group.

The unit of enumeration of large-scale enterprises in the Surveys is the firm rather than the establishment. However, firms are offered the option of responding by establishment. In so far as the same firms are split by economic activity, the responding unit is often of an establishment nature (see notes on Page 109).

2. None-Response: - Estimates have been made for non-response.

3. Definitions: - The definitions used for the Surveys of Industrial production are as follows.

- (i) Labour Costs - Labour Costs include salaries and wages paid in cash plus cost of other labour benefits.
- (ii) Input - Input includes industrial costs plus cost of goods for resale and overhead costs like rents, rates, water, stationery, advertising expenses, transport, head office costs, insurance, audit fees, legal expenses etc., less change in stocks of raw materials, components, supplies, spare parts etc.
- (iii) Output - Output is the value of sales or work done, plus resales, plus change in stocks of semi-finished and finished goods, rents received on non-residential buildings, self-produced capital assets, indirect taxes such as sales and excise.

- (iv) Gross Product. - Gross Product is the aggregate difference between output and input:- It includes labour costs, interest payments, depreciation charges, and net profit before tax.

4. Changes have occurred in the figures over the years covered due to re-classifications, wider coverage and further refinements of the data.

5. In 1972, Kenya adopted the 4-digit United Nations International Standard Industrial Classification (ISIC) of all economic activities. The main change that affected the manufacturing sector was the exclusion of repair of motor vehicles, which as hitherto included in the manufacturing sector in the 3-digit ISIC.

BUILDING AND CONSTRUCTION

Notes and Definitions

Statistics of Private buildings are compiled from returns of private buildings and extensions completed in the municipalities. The term "extension" includes all major alterations and additions to buildings. Buildings which are partially residential and partially non-residential have been classified according to their main usage. The classification is based on the floor area. This is defined as plinth area together with floor area of any external ancillaries such as garages, servants' quarters, store rooms, lavatories, etc. A block of flats maisonnettes is counted as a single building.

MINING

NOTES AND DEFINITIONS:

The definition of items in Table 100 is the same as on page 106. The figures cover only private firms with fifty or more employees. The definition of items in Table 100 is the same as on page 106. The figures cover only private firms with fifty or more employees. Kenya statistics of mineral production are compiled from returns made by mining concerns. For salt and lime, only commercial output is covered. Consequently considerable quantities of these items which are mined and used on farms, e.t.c. are not recorded. The value given for gold, lime and diamond are the amounts realised by the producers. The production of limestone and gypsum excludes the part used in the production of local cement.

Notes and Definitions

Currency - Notes of the Central Bank of Kenya were first issued on 14th September 1966, and coins on 10th April 1967. The volume of Kenya currency in circulation is shown in Table 121.

The unit of currency in Kenya is the Kenya Shilling, which is divided into one hundred cents, with twenty Kenya shillings equal to one Kenya pound. The Kenya shilling was tied to the SDR on 27th October, 1975. The SDR is a weighted average of exchange rates of the five leading world currencies, namely, the USA dollar, the Pound Sterling the Deutsche mark, the Japanese Yen and the French Franc. Notes of the Central Bank of Kenya are circulated in the following denominations: Ksh.5/-, 10/-, 20/-, 50/-, 100/- 200/-, 500/- and 1,000/- and coins in denominations of 5 cents, 10 cents, 50 cents, 1/-, 5/-, 10 and 20/- (the first two coins being nickelbrass, and the other cupro-nickel).

As from 14th September 1967, East African Currency Board notes ceased to be legal tender in Kenya. The dates for the withdrawal of the legal tender status from the E. A. Currency Board "coin" was 10th April 1969, and the Board was wound up at the end of 1969. Data on the Board's assets and currency in circulation is shown in 1974 and earlier issues of the Abstract.

Commercial Banking - The main categories of deposits are defined as follows:-

Demand: subject to transfer by cashing or cheques. These deposits carry no rates of interest.

Time: usually not subject to transfer by cheque and lodged for a definite period subject to notice of withdrawal; interest paid to depositors.

Saving: lodged for no fixed period- certain conditions are applicable to depositors who wish to avail of cheque facilities; interest paid to depositors.

The Agricultural Finance Corporation - The former Land and Agricultural Bank of Kenya and the Agricultural Finance Corporation were legally amalgamated on 21st March, 1969 to form the **Agricultural Finance Corporation**. The A.F.C. assumed the functions that were previously performed by the two bodies. Assets and liabilities of the Bank are shown in the 1974 and earlier issues of the Abstract.

Insurance-Statistics on insurance have been obtained through an annual survey of insurance companies. These surveys for the years up to 1967, were conducted by East African Statistical Department, for the years 1968, and 1970 by Central Bank of Kenya and for the years 1971 - 1991 by Central Bureau of Statistics. From 1992 onwards **Commissioner of Insurance** has assumed responsibility for this survey.

Non-Bank Financial Intermediaries - statistics on Non-Bank Financial Intermediaries have been obtained through a quarterly survey of these institutions by the Central Bank of Kenya since 1968. The Financial Institutions included in the survey are:

1. Bank of India Finance Ltd.
2. Consolidated Bank Finance.
3. Consolidated Bank Mortgage
4. Devna Finance Ltd.
5. Diamond Trust of Kenya Ltd.
6. Fortune Finance Ltd.
7. Housing Finance of Kenya Ltd.

Notes and Definitions

1. Kenya Railways Corporation

Statistics on the operation of the Railways Corporation relating to: Revenue; Expenditure; Traffic carried; Kilometres of lines open for Traffic; and Stocks of transport equipment are derived from the annual report of the Corporation. For accounting purposes capital expenditure is defined as including purchases of land, expenses of loan issue and interest paid out of capital. This definition of capital expenditure differs slightly from the "economists" definition used elsewhere in this Abstract, e.g. in the tables on Gross Capital Formation included in the National Accounts Section.

2. Kenya Ports Authority

As in the case of the Railways, statistics on Kenya Ports Authority relating to revenue and expenditure are derived from the annual report of the Authority. Consequently, as noted above the definition expenditure differs from the "economists" definition used elsewhere in this Abstract.

3. Shipping

(a) Statistics relate to both steam and sailing ships engaged in international or coastwise trade, arriving either with cargo or in ballast. A tug with lighters in tow is counted as a single steamship with a tonnage equal to the combined tonnage of the tug plus the lighters. Naval craft are not included.

(b) Returns are made by the following Kenya Ports - each call at a port being counted separately:- Mombasa, Malindi, Lamu, Kilifi and Shimoni.

4. Air Traffic

- (a) All scheduled services are operated from Jomo Kenyatta International Airport Nairobi while Wilson Airport operates non-scheduled commercial services only. Moi International Airport, has been enlarged and modernized to cope with scheduled and non-scheduled services.
- (b) Air Force/Military, Police, training, testing and private aircraft movements are not recorded.
- (c) Transit passengers are included once, in total number of passengers handled as from 1970. Prior to 1970 they were included twice.
- (d) Passengers in transit: Those continuing their journey in the same aircraft.
- (e) Passengers landing or embarking: Mainly those completing or commencing their journey, but the statistics do include a small number changing aircraft or staying over for a few days.
- (f) Freight handled: The weight of freight and mail unloaded from or loaded into aircraft. It does not include aircraft fuel or stores or goods remaining in the

aircraft.

- (g) Movements: Each touch-down and take-off is counted as a separate movement.
- (h) For the purpose of direction of air traffic, countries of origin and destination of the aircraft have been grouped into regions, in order to avoid disclosing the operations of individual companies. The countries included in each region are as follows:-

- (1) United Kingdom - includes Eire.
- (2) Continental Europe - Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, Germany, Greece, Hungary, Italy, Luxembourg, Netherlands, Norway, Poland, Rumania Spain, Sweden, Switzerland, U.S.S.R. Yugoslavia.
- (3) Middle East - Cyprus, Egypt, Iran, Israel, Lebanon, Syria, Turkey.
- (4) Arabian Peninsula, Pakistan and India - Aden, Bahrain, Sri Lanka, India, Kuwait, Oman, Pakistan, Saudi Arabia, Yemen.
- (5) Africa North of the Equator (excluding Egypt) - Algeria, Cameroon, Central African Republic, Chad, Dahomey, Ethiopia, Gabon, Ghana, Ivory Coast, Libya, Mali, Mauritania, Morocco, Nigeria, Senegal, Sierra Leone, Somalia, Sudan, Togo, Tunisia, Upper Volta.
- (6) Africa South of the Equator and Adjoining Islands - Angola, Congo, Malagasy (Madagascar), Mauritius, Malawi, Mozambique, Reunion, Republic of South Africa, Rhodesia, Zaire, Zambia.
- (i) 1 kilogram (kg.) = 2.205 lb., 1,000 kilograms = 2,205 lb. = 1 Metric Ton.

5. Roads:-

Roads Department-completed the road reclassification in 1970. All roads in Kenya now fall under one of the following

categories:-

- (i) A-International Trunk Roads: Link centres of international importance, and crossing international boundaries or terminating at international ports.
- (ii) B-National Trunk Roads: Link nationally important centres.
- (iii) C-Primary Roads: Link locally important centres to each other and to higher class roads.
- (iv) D-Secondary Roads: Link locally important centres to each other and to higher class roads.
- (v) E-Minor Roads: Any link to a minor centre.
- (vi) F-Special Purpose Roads: Include tourist, township, agriculture, fish and strategic roads.

EDUCATION

Coverage

The statistics in respect of primary and secondary school enrolments refer to enrolment as at 31st March. The statistics cover all schools, i.e. both public and some private schools. The coverage on Private schools has been generally low.

Data on Technical Training Institutions excludes enrolments at Mombasa, Eldoret, and Kenya polytechnics and refer only to the former technical secondary schools that were converted to Technical Training Institutes. Enrolment at the Kenya Technical Teachers College is included together with other teachers' training colleges.

Data on higher education consists of enrolments at the Universities of Nairobi, Moi, Kenyatta, Egerton, and Jomo Kenyatta University of Agriculture and Technology (JKUAT).

Definitions

Schools maintained by the Central Government are classified as "Public" whereas those which receive no grant from the Central Government are classified as "private" schools.

Teachers are categorized into professionally and non-professionally qualified groups. A professionally qualified teacher must either have attended a teacher training college and have been awarded a teaching certificate or be a graduate with a degree of Bachelor of Education or a degree in any other discipline and a teaching diploma.

Any person registered as an examination candidate who immediately before registration was not enrolled as a pupil/student in an educational institution is categorized as a private candidate.

PUBLIC HEALTH

Notes and Definitions

The Statistics in Table 169 must be read with caution. Since there is a single fee for registration, and no annual licence, respective registers may include those who do not practice or who have left the country. The Statistics of diseases reported may imply that relatively little progress is being made. In fact, the improvement in statistical coverage is obscuring the real progress which is taking place.

PUBLIC FINANCE

Notes and Definitions

The form in which Government accounts are kept and published is determined by the administrative structure, and by the requirements of financial control. Tables 171 (a)-172 and 176-184 of this section accounts, have been rearranged into a format which makes analysis of revenue and expenditure more convenient. In carrying out this reclassification, the recommendations of the United Nations for the analysis of Government accounts have been followed.

Table 171 (a) is a summary of the Appropriation Accounts while Table 171 (b) summarizes the results of the reclassification of revenue and expenditure. The totals of revenue and expenditure as shown in the following tables differ from the totals shown in the Government Appropriation Accounts and in the published estimates of expenditure and revenue. The principle reasons for these differences are:-

- The division of the budget into Recurrent and Development Accounts causes transfer of various expenditure items from one account to the other. The figures included in these tables eliminate any resultant double counting in the Appropriation Accounts;
- Both revenue and expenditure are gross of Appropriation-in-Aid (the revenue earned by Departments and Ministries by the provision of goods and services appropriated to meet their own expenditure) instead of net as voted in the Budget;
- Expenditure under Consolidated Fund Services has been included with the Central Government figures, to give a complete picture of the Budget.

The following figures for the year 1993/94 - 1996/97 reconcile total revenue and expenditure as shown by the reclassification with the accounting figures in the Appropriation Accounts. From them it is possible to see, firstly, revenue and expenditure (reclassified) net of Appropriations-in-Aid and, secondly, the amount of double-counting arising from inter-account and other internal transfers.

Notes, Definitions and Coverage

Most of the tables in this section are derived from the Annual Enumeration of Employees and Self-employed Persons. This enumeration takes place at the end of June. The annual wage bill is estimated from monthly data - the reported earnings for the month of June being multiplied by twelve.

Wage employment figures as shown in this section may not compare with those shown elsewhere in the Abstract, e.g. in the Industrial Production Section. This is due to differences in coverage, timing, etc. between the annual enumeration of employees and the other enquiries in which information on employment is also collected.

Public services include Central Government, Parastatal Bodies, Local Government, E.A. Development Bank and Kenya National Examinations Council.

All private establishments in urban areas, large-scale farmers and other large-scale enterprises located in the rural areas as well as establishments of the public sector engaged in industrial, commercial, agricultural and other activities are asked to state their main activity, and this is the basis of industrial classification.

Wage employment figures include casual employees, part-time workers, directors and partners serving on a regular basic salary contract. Self-employed persons and family workers who do not receive regular wages or salaries are excluded. Employment in the informal sector of the economy is not included in the Abstract. Also excluded are employment figures for rural small scale agriculture and pastoralists activities.

Earnings or wages cover all cash payments, including basic salary, cost of living allowances, profit bonus, together with the value of rations and free board, and an estimate of the employer's contribution towards housing. Earnings as shown in this section are lower than the estimate of factor income going to employees (Table 32) because they exclude pensions, employers contributions to the National Security Fund or private provident funds and personal emoluments for the armed forces. Earnings in informal sector, rural small scale agriculture and pastoralists activities are excluded.

The economic classification used in this chapter from 1976 is a slightly modified version of the United Nations' 4-digit international Standard industrial Classification.

RETAIL PRICES AND CONSUMER EXPENDITURE

Notes and Definitions

The Weight used for the Revised Nairobi consumer prices indices as published in this Abstract are derived from the Urban Household Budget Survey under taken in 1982. Revised indices based on these weights together with a methodological description is published in the 1992 "Economic Survey"

The base period for the revised series is Feb/March 1986=100 and the series has been computed from March 1990 onwards. A series for the intervening period has been developed and is published in the 1992 "Economic Survey".

Lower Income Index of Consumer Prices.

The Lower income index of consumer prices is designed to measure changes in retail prices of good and services consumed by household in the lower income groups. In the previous years the index referred to households earnings up to Kshs 699 per month. It is now redefined to be one with income of up to Kshs. 1,999 per month.

Upper Income Index of Consumer Prices.

The upper income index of consumer prices is designed to measure changes in retail prices of goods and services consumed by Persons in the upper income bracket. In the previous years, the index referred to households earnings: Kshs 2500 and above per month. It is now redefined to be one with income of Kshs 8,000 and above per month.

The weights of the commodity groups embraced in the old and revised Upper Income Index are as follows:-
