

CPI AND INFLATION RATES FOR THE MONTH OF APRIL 2011

Kenya National Bureau of Statistics hereby releases the Consumer Price Indices (CPI) and inflation rates for April 2011. These numbers have been generated using data collected within the second and third weeks of the month under review. The prices were obtained from selected retail outlets in 25 data collection zones located in 13 urban centers.

As reflected in Tables 1 and 2, the CPI increased by 3.20 per cent from 114.62 in March 2011 to 118.29 in April 2011. The overall inflation rate stood at 12.05 per cent in April 2011.

The Food and Non Alcoholic drinks' index went up by 4.76 per cent between March 2011 and April 2011. This was attributed to cost increases recorded in respect of food products such as maize flour, potatoes, beef, maize grain, tomatoes, beans, milk and bread.

The Transport index rose by 4.29 per cent, mainly due to increased costs of petrol, diesel and bus/matatu fares. The prices of these items went up by 8.47, 2.32 and 5.97 per cent, respectively, between March and April 2011.

Housing, Water, Electricity, Gas and Other fuels' index went up by 2.21 per cent in the period under review mainly on account of continued increases in the prices of electricity and other essential cooking fuels. The main causes of higher cost of electricity were the continued increases in the fuel and forex adjustment charges. For instance, for every Kwh of electricity, fuel cost adjustment charges rose from KSh 5.73 in March 2011 to KSh 6.15 in April 2011.

Compared to April last year significant increases in the prices of a number of commodities have been noted. Table 3 gives the average prices of some selected items recorded in April 2011 alongside those in April 2010.
